***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1 and 3-14 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by WO 97/40357.

WO 97/40357 teaches in figures 3,5,7,15,21,22 and 24 a device having a tubular vessel body(14) with a cover(16). An internal tube(30) has a diameter that is smaller than vessel body(14) and fits coaxially within the body(14). Figure 22 teaches insertion of a pipette(222) that is associated with a piston/plug that supplies the sample and has been read on the claimed "piston plug".

***Conclusion***

Art Unit: 1743

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Reiter and Fay teach coaxial alignment of a tube within a tube but are silent to the claimed "piston plug".
